Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the [Access Levels descriptions](#).

New in this Release	4
Resolved Issues	5
Notes	6
Documentation	7

New in this Release

There were no new features in Community Component version 12.4.0.

Resolved Issues

The following issues were resolved in IDOL Community Component version 12.4.0.

- On Linux, when running some older versions of the Linux kernel, IDOL components could fail to connect to network ports.

Notes

These notes provide extra information about installing and using IDOL Community Component.

- The *v4* configuration parameter in the *MySecurityRepository* section has been deprecated. Micro Focus recommends that you use only the version 4 Autonomy security types, in which case you do not need to set this parameter.

The *v4* parameter is still available for existing implementations, but it might be incompatible with new functionality. The parameter might be deleted in future.

Documentation

The following documentation was updated for IDOL Community Component version 12.4.0.

- *IDOL Expert*
- *IDOL Getting Started Guide*
- *IDOL Server Reference*
- *IDOL Community Component Reference*
- *IDOL Server Administration Guide*
