Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the [Access Levels descriptions](#).

New in this Release 4

Resolved Issues 5

Documentation 6

New in this Release

The following new features were released in Find version 12.9.0.

- When using a reverse proxy, you can now instruct Find to use roles and security info from Community. Previously, when using a reverse proxy to pass user information to Find over AJP, you were required to configure a fixed set of user roles, or use the default set.

To use the Community role option, you must start Find with the command-line option - `Dfind.reverse-proxy.pre-authenticated-roles=` (as an empty value). You must also make sure your Community configuration has the `CheckEntitlement` parameter set to `False` (the default value).

Resolved Issues

There were no resolved issues in Find version 12.9.0.

Documentation

The following documentation was updated for Find version 12.9.0.

- *Find Administration Guide*
