

Sentinel 8.6.1.1 Release Notes

July 2024

Sentinel 8.6.1.1 addresses some of the customer bugs as well as some existing Sentinel product bugs.

Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the [Sentinel forum](#), our online community that also includes product information, blogs, and links to helpful resources. You can also share your ideas for improving the product in the [Ideas Portal](#).

The documentation for this product is available in HTML and PDF formats on a page that does not require you to log in. If you have suggestions for documentation improvements, click the comment icon on any page of the Release Note, HTML version. To download this product, see the [Product Download](#) website.

What's New?

The following sections outline the key features provided by this release, as well as issues resolved in this release:

JDK Upgrade

Sentinel now supports the JDK version 8u412b08.

Security Vulnerability Fixes

Code fixes have been made to address security vulnerabilities across various components.

Deprecation and Obsolescence

Deprecating Appliance Support

Starting October 2024, the ISO, VHD, and OVF appliance files will no longer be available on the product download site. For more information, contact the technical support team.

Software Fixes

Failure to Remove the Dynamic List Item Through Action

Issue: The dynamic list item cannot be removed through action when a correlation rule is triggered.

Workaround: This issue has been fixed now.

System Requirements

For information related to hardware requirements, supported operating systems, and browsers, see the [Sentinel System Requirements](#).

License and Purchasing Information

To purchase an enterprise license or upgrade your existing license, call 1-800-529-3400, email info@microfocus.com or visit <https://www.microfocus.com/en-us/products/netiq-sentinel/contact>.

Installing Sentinel 8.6.1.1

For information about installing Sentinel 8.6.1.1, see the [Sentinel Installation and Configuration Guide](#).

NOTE: All the hosts used for the Sentinel server and its components must be set up in two way DNS resolvable environment (Hostname to IP and IP to Hostname).

Upgrading to Sentinel 8.6.1.1

You can directly upgrade to Sentinel 8.6.1.1 from 8.3.1.0 and later versions of Sentinel. If you have a version older than Sentinel 8.3.1.0, then you must first upgrade to Sentinel 8.3.1.0 and then to Sentinel 8.6.1.1.

For Traditional installation, see [Upgrading the Operating System](#) in [Sentinel Installation and Configuration Guide](#).

Contacting Open Text

For specific product issues, contact Open Text Support [Open Text Support](#).

Additional technical information or advice is available from several sources:

- ◆ Product documentation, Knowledge Base articles, and videos: [Customer Support](#).
- ◆ The Community pages: [Open Text Community](#).
