Copyright 2024 Open Text

The only warranties for products and services of Open Text and its affiliates and licensors (“Open Text”) are as may be set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Open Text shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

## Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

## Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that OpenText offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- View information about all services that Support offers
- Submit and track service requests
- Contact customer support
- Search for knowledge documents of interest
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in.

# Test Data Management Release Notes

**Software Version:** 24.1.0

**Publication Date:** January 2024

This document is an overview of the new features and changes made to Test Data Management (TDM). It contains important information that is not included in book or Help. You can find information about the following in this document:

- [What's new, on the next page](#)
- [Installation notes, on page 6](#)
- [Fixed issues, on page 7](#)
- [Known problems, limitations, and workarounds, on page 8](#)

## Related Documentation

The following documentation is available for this product:

Document name	Description
Test Data Management Installation Guide	Explains how to install the product.
Test Data Management Docker Installation on Windows Virtual Machines	Explains how to install Docker on Windows Virtual Machines.
Test Data Management User Guide	Explains how to use the product.

# What's new

Test Data Management 24.1.0 release brings in a few new features and enhancements:

## New features:

- The logo, copyright, and documentation are now branded under the OpenText name.
- Added a new feature that allows users to import a CSV file to create list generators automatically. Multiple columns are supported as multiple list generators.
- Added **Synthetic Data Generation**
  - Required configuration pages for synthetic flow generation have been added.
  - Synthetic flows can be created based on SDM environments.
  - List generators can be configured for text, integer, and decimal values.
  - Synthetic flows can be added to TDM projects.
  - Synthetic flows can be bound to TDM data generation cases.
- Added **Check Flow Updates** feature to the synthetic flow list
  - Tables and columns that are updated within the related synthetic flow will be indicated with icons and a detailed log report.
  - Users will be warned to update the generator configuration, as well.

## Enhancements:

- Changes are made to docker containers so that they will automatically start once the docker restarts.
- Removed the auto-generation feature of TDM schemas and tables. The user should create them manually by running provided SQL scripts during installation, instead.

## Installation notes

The installation specifications and step by step instructions to install the Test Data Management are provided in the *Test Data Management Installation Guide* document.

## Fixed issues

- Date type parameters that formatted wrongly while running data generation suites.
- Date formatting in **DateGenerator** and **DatetimeGenerator** generator types.
- Visual distortion of lists while zooming in and out.
- Spelling on each page.
- The **SAVE** button not getting activated, if no flow is selected while creating or editing the project.
- Flow getting removed from the project.
- Updated **Warning** message appearing on the screen while creating a project .
- Parameters cannot be shown as an option before starting to run a case.

## **Known problems, limitations, and workarounds**

This section covers known problems, limitations, and workarounds about TDM.

- Limitations that are marked in release 2.0.0 are also valid for TDM 24.1.0.
