SERVICE OVERVIEW

Network and Information Security (NIS2) Cybersecurity Assessment and Gap Analysis

Protect your organization from NIS2 violation penalties

- Know your organization's NIS2 compliance level
- Understand your environment's strengths and weaknesses
- Make informed decisions with expert advice

The NIS2 (Network and Information Security) Directive aims to protect critical organizations and infrastructure within the EU from cyberthreats and to achieve an elevated level of common security. Organizations, both within the EU and externally, that are considered essential under the law must be in compliance by 18 October 2024 or risk penalties for violations.

The OpenText™ Professional Services NIS2 Cybersecurity Assessment and Gap Analysis is a 10-day service that enables our customers to better position themselves for compliance with the EU NIS2 directive.

Covering the 10 required measures of Article 21, Professional Services:

- Investigates your governance and reporting processes for significant incidents and assesses the level of compliance with the NIS2 requirements for each measure.
- Conducts in-depth interviews and applies a maturity model analysis to determine an organization's level of compliance.
- Provides insights into the strengths and weaknesses of the current environment, which can then guide process improvements.
- Provides a report that indicates the compliance status of specific items, along with any recommendations to address any identified gaps.

Know your organization's NIS2 compliance level

Your assessment with gap analysis will cover Article 21's 10 required measures and investigate governance processes and procedures for reporting significant incidents.

The OpenText NIS2 assessment involves conducting in-depth interviews and a maturity model analysis to determine a company's NIS2 level of compliance.

Understand your environment's strengths and weaknesses

Assessment results provide insights into the current environment's strengths and weaknesses, which can help guide process improvements. The assessment will highlight which items comply or are partially compliant. With a clear understanding of what you need to do to meet NIS2 mandatory measures and requirements, you can avoid non-compliance penalties.

Make informed decisions with expert advice

You can either choose to address your compliance gaps internally or ask for Professional Services support. OpenText also has key cybersecurity solutions to aid compliance with the NIS2 directive.

As a world leader in cybersecurity, OpenText brings decades of consulting experience to helping our customers with NIS2 compliance. Our solutions can be tailored to meet your organization's specific needs and drive outstanding outcomes.
